

17 : Neurological Disorders

[We-P001]

**Functional connectivity biomarker for differentiating neocortical epilepsy and mesial temporal lobe epilepsy**

Seung-Hyun Jin\* and Chun Kee Chung  
*Seoul Nat'l Univ., Korea*

[We-P002]

**MEG cross-frequency analysis in patients with Alzheimer's disease**

Marjolein Engels\*, Meichen Yu\*, Arjan Hillebrand, Philip Scheltens, Wiesje van der Flier, Ilse van Straaten, and Cornelis Stam  
*VU Univ. Medical Center Amsterdam, The Netherlands*

[We-P003]

**Comparison of incidental memory between Alzheimer's patients and age matched controls**

Rebecca Beresford<sup>1,2\*</sup>, Elisa Cooper<sup>2</sup>, Andrea Greve<sup>2</sup>, and Rik Henson<sup>2\*</sup>  
*<sup>1</sup>Univ. of Cambridge, UK, <sup>2</sup>MRC Cognition and Brain Sciences Unit, UK*

[We-P004]

**Reduced visual gamma oscillations in multiple sclerosis patients**

Eleanor Barratt, Margareta Clarke, Nikos Evangelou, Penny Gowland, Peter Morris, Susan Francis, and Matthew Brookes  
*Univ. of Nottingham, UK*

[We-P005]

**Usefulness of source localization using wide time window and multiple frequency band in ictal MEG**

Woorim Jeong<sup>1,2</sup>, June Sic Kim<sup>2</sup>, and Chun Kee Chung<sup>1,2,3\*</sup>  
*<sup>1</sup>Seoul Nat'l Univ. Hospital, Korea, <sup>2</sup>Seoul Nat'l Univ. College of Natural Science, Korea, <sup>3</sup>Seoul Nat'l Univ. Medical Research Center, Korea*

[We-P006]

**Differences in resting state connectivity in an injured brain under influence of Zolpidem - a case study**

Praveen Sripath<sup>1\*</sup>, Frank Boers<sup>1</sup>, Ralf Clauss<sup>2</sup>, Karl-Josef Langen<sup>1</sup>, N. Jon Shah<sup>1,3,4</sup>, and Jürgen Dammers<sup>1</sup>  
*<sup>1</sup>Forschungszentrum Juelich, Germany, <sup>2</sup>Royal Surrey County Hospital, UK, <sup>3</sup>Jülich Aachen Research Alliance, Germany, <sup>4</sup>RWTH Aachen, Germany*

[We-P007]

**Consistency of MEG and fMRI findings in revealing the functional neurocompensatory response in early Alzheimer's disease**

Xiaowei Song<sup>1,2,3\*</sup>, Careesa C. Liu<sup>2,3</sup>, Sujoy Ghosh Hajra<sup>2,3</sup>, Gabriela Pawlowski<sup>2</sup>, Maggie Clarke<sup>3</sup>, Emily Gallivan<sup>3</sup>, and Ryan D'Arcy<sup>1,2,3\*</sup>  
*<sup>1</sup>Fraser Health Authority, Canada, <sup>2</sup>Simon Fraser Univ., Canada, <sup>3</sup>Nat'l Research Council, Canada*

**[We-P008]****Spontaneous theta-band cortical rhythms as a sign of dysfunction in traumatic brain injury patients**Hanna Kaltiainen<sup>1,2,3,4\*</sup>, Liisa Helle<sup>1,5\*</sup>, Mia Liljeström<sup>1,2</sup>, Hanna Renvall<sup>1,2</sup>, and Nina Forss<sup>1,2</sup><sup>1</sup>Aalto Univ., Finland, <sup>2</sup>Univ. of Helsinki, Finland, <sup>3</sup>Aalto Neuroimaging, MEG Core, Finland, <sup>4</sup>Lohja District Hospital, Finland, <sup>5</sup>Elekta Oy, Finland**[We-P009]****Altered resting state network in fibromyalgia based on persistent network homology**Mi Kyung Choe<sup>1</sup>, Manyoel Lim<sup>2</sup>, June Sic Kim<sup>1</sup>, and Chun Kee Chung<sup>1,2,3\*</sup><sup>1</sup>Seoul Nat'l Univ. College of Natural Science, Korea, <sup>2</sup>Seoul Nat'l Univ. Medical Research Center, Korea, <sup>3</sup>Seoul Nat'l Univ. Hospital, Korea**[We-P010]****Magnetoencephalography in insular epilepsy**

Majed AlHameed\* and Vahe Poghosyan\*

King Fahad Medical City, Saudi Arabia

**[We-P011]****MEG may reveal new population of spike in epilepsy with porencephalicyst/encephalomalacia**Yosuke Kakisaka<sup>1\*</sup>, Irene Wnag<sup>2</sup>, Sumiya Shibata<sup>2</sup>, and Richard Burgess<sup>2</sup><sup>1</sup>Tohoku Univ., Japan, <sup>2</sup>Cleveland Clinic Foundation, USA**[We-P012]****Presurgical evaluation in young children with refractory epilepsy: a pediatric MEG study**Ashley Curran, Banu Ahtam, Kathryn Gill, Chellamani Harini, Matti Hämäläinen, P. Ellen Grant, and Yoshio Okada  
Harvard Medical School, USA**[We-P013]****Magnetoencephalogram of dentatorubral-pallidolusian atrophy**Hiroyuki Yamamoto<sup>1,2\*</sup>, Kiyoshi Egawa<sup>2</sup>, Masashi Narugami<sup>2</sup>, Tomoshiro Ito<sup>2</sup>, Chiyo Manabe<sup>3</sup>, Kayoko Takahashi<sup>3</sup>, Shingo Nakane<sup>3</sup>, and Hideaki Shiraishi<sup>2\*</sup><sup>1</sup>Nagoya Univ., Japan, <sup>2</sup>Hokkaido Univ., Japan, <sup>3</sup>Hokkaido Univ. Hospital, Japan**[We-P014]****The value of "negative" MEG studies: Defining the functional deficit zone using spontaneous MEG in children with intractable epilepsy**Jeremy Moreau<sup>1,2\*</sup>, Patricia Tomaszewski<sup>1,2</sup>, Jean-Pierre Farmer<sup>2</sup>, Jeffrey Atkinson<sup>2</sup>, Bernard Rosenblatt<sup>2</sup>, Sylvain Baillet<sup>1</sup>, and Roy Dudley<sup>2\*</sup><sup>1</sup>McGill Univ., Canada, <sup>2</sup>Montreal Children's Hospital, Canada**[We-P015]****Interictal high frequency oscillations detected with simultaneous magnetoencephalography and scalp electroencephalography as biomarker of pediatric epilepsy**Eleonora Tamilia\*, Naoaki Tanaka, Joseph R. Madsen, Phillip L. Pearl, Steven Stufflebeam, and Christos Papadelis  
Harvard Medical School, USA

[We-P016]

**Resting-state MEG reveals different patterns of aberrant functional connectivity in combat-related mild traumatic brain injury**

Mingxiong Huang<sup>1,2\*</sup>, Deborah Harrington<sup>1,2</sup>, Ashley Robb-Swan<sup>2</sup>, Annemarie Angeles<sup>2</sup>, Sharon Nichols<sup>1</sup>, Angela Drake<sup>3</sup>, Tao Song<sup>1</sup>, Mithun Diwakar<sup>1</sup>, Charles Huang<sup>1</sup>, Victoria Risbrough<sup>2</sup>, Anders Dale<sup>1</sup>, Hauke Bartsch<sup>1</sup>, Roland Lee<sup>1,2</sup>, and Dewleen Baker<sup>1,2</sup>

<sup>1</sup>Univ. of California, San Diego, USA., <sup>2</sup>VA San Diego Healthcare System, USA, <sup>3</sup>Naval Medical Center, USA

[We-P017]

**Abnormal cortical source activities in patients with rapid-eye movement sleep behavior disorder during a visuospatial attention task**

Kwang Su Cha<sup>1</sup>, Jeong Woo Choi<sup>1</sup>, Byeong Uk Lee<sup>2</sup>, Sun-A Koo<sup>2</sup>, Jeong Ik Byun<sup>3</sup>, Jun Sang Sunwoo<sup>4</sup>, Ki-Young Jung<sup>2</sup>, and Kyung Hwan Kim<sup>1\*</sup>

<sup>1</sup>Yonsei Univ., Wonju, Korea, <sup>2</sup>Seoul Nat'l Univ. Medical Center, Korea, <sup>3</sup>Kyung Hee Univ. Medical Center, Korea, <sup>4</sup>Soonchunhyang Univ., Korea

[We-P018]

**Modulations of extrinsic and intrinsic connections among neuronal sources during epileptic seizures: an intracranial electroencephalographic study using dynamic causal modeling**

Chang-hyun Park, Yun Seo Choi, A-Reum Jung, Eun Jin Kwon, Ji-Eun Lee, and Hyang Woon Lee\*  
*Ewha Womans Univ., Korea*

[We-P019]

**Connectivity in language network after hemispherotomy**

Jeong-Sug Kyong<sup>1\*</sup>, June Sic Kim<sup>1</sup>, and Chun Kee Chung<sup>1,2\*</sup>

<sup>1</sup>Seoul Nat'l Univ., Korea, <sup>2</sup>Seoul Nat'l Univ. Hospital, Korea

[We-P020]

**Cortical Dis-inhibition in chronic tinnitus: An ERP Study**

Jeong-Sug Kyong<sup>1,2</sup>, Tae-Soo Noh<sup>2</sup>, June Sic Kim<sup>1</sup>, Moo-Kyun Park<sup>2</sup>, Jun-Ho Lee<sup>2</sup>, Seung-Ha Oh<sup>2</sup>, Chun Kee Chung<sup>1,2</sup>, and Myung-Whan Suh<sup>2\*</sup>

<sup>1</sup>Seoul Nat'l Univ., Korea, <sup>2</sup>Seoul Nat'l Univ. Hospital, Korea

[We-P021]

**Decreased corticokinematic coherence in patients with Friedreich's Ataxia**

Brice Marty<sup>1\*</sup>, Gilles Naeije<sup>1</sup>, Vincent Wens<sup>1</sup>, Mathieu Bourguignon<sup>2</sup>, Riitta Hari<sup>3</sup>, Veikko Jousmäki<sup>3</sup>, Massimo Pandolfo<sup>1</sup>, and Xavier De Tiège<sup>1</sup>

<sup>1</sup>Universite Libre de Bruxelles, Belgium, <sup>2</sup>Basque Center on Cognition, Brain & Language, Spain, <sup>3</sup>Aalto Univ., Finland

[We-P022]

**Effective connectivity of epileptic networks using intracranial ictal EEG recordings**

Yun Seo Choi<sup>1</sup>, Jiseon Lee<sup>1</sup>, Chang-Hyun Park<sup>1</sup>, A-reum Jung<sup>1</sup>, Ji-Eun Lee<sup>1</sup>, Eun Jin Kwon<sup>1</sup>, Jeong Woo Choi<sup>2</sup>, Kyung Hwan Kim<sup>2</sup>, Rita Yu<sup>3</sup>, Heung Dong Kim<sup>3</sup>, and Hyang Woon Lee<sup>1\*</sup>

<sup>1</sup>Ewha Womans Univ., Korea, <sup>2</sup>Yonsei Univ., Wonju, Korea, <sup>3</sup>Yonsei Univ. College of Medicine, Korea

**[We-P023]****Corticomuscular coherence correlates with critical flicker frequency but not with GABA+/Cr levels in patients with hepatic encephalopathy**

Thomas J. Baumgarten<sup>1\*</sup>, Markus Butz<sup>1</sup>, Georg Oeltzschner<sup>1,2,3</sup>, Nienke Hoogenboom<sup>1</sup>, Hans-Jörg Wittsack<sup>1</sup>, and Alfons Schnitzler<sup>1</sup>

<sup>1</sup>Heinrich Heine Univ. Düsseldorf, Germany, <sup>2</sup>The Johns Hopkins Univ., USA, <sup>3</sup>Kennedy Krieger Inst., USA

**[We-P024]****Late restructuring and atypical development of resting state neural synchrony in autism**

Annette X. Ye<sup>1,2,3\*</sup>, Simeon M. Wong<sup>1,2</sup>, Ann-Kathrin Thoene<sup>4</sup>, Sam M. Doesburg<sup>5</sup>, and Margot J. Taylor<sup>1,2,3</sup>

<sup>1</sup>The Hospital for Sick Children, Canada, <sup>2</sup>The Hospital for Sick Children Research Inst., Canada, <sup>3</sup>Univ. of Toronto, Canada, <sup>4</sup>Universität Oldenburg, Germany, <sup>5</sup>Simon Fraser Univ., Canada

**[We-P025]****Comparing phase- and amplitude-mediated intrinsic connectivity networks in mild traumatic brain injury**

Benjamin Dunkley<sup>1\*</sup>, Leodante Da Costa<sup>2</sup>, Allison Bethune<sup>2</sup>, Elizabeth Pang<sup>1</sup>, and Margot Taylor<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children, Canada, <sup>2</sup>Sunnybrook Hospital, Canada

**[We-P026]****MEG/MSI of epilepsy patients with VNS implantation: ECD and sLORETA analy**

Wenbo Zhang<sup>1,2\*</sup>, Jason Doescher<sup>1,2</sup>, and Deanna Dickens<sup>1,2</sup>

<sup>1</sup>Minnesota Epilepsy Group, USA, <sup>2</sup>Univ. of Minnesota, USA

**[We-P027]****Dual-mode noninvasive brain Stimulation for post-stroke cognitive impairment**

Ahee Lee, Eunhee Park, Hee Goo Kim, A Young Cho, Won Hyuk Chang, and Yun-Hee Kim\*

Sungkyunkwan Univ., Korea,

**[We-P028]****A study on interictal MEG source imaging in epileps**

Chae Jung Park<sup>1,2</sup>, Eun Yeon Joo<sup>2,3</sup>, and Seung Bong Hong<sup>2,3</sup>

<sup>1</sup>Samsung Medical Center, Korea, <sup>2</sup>Samsung Biomedical Research Inst., Korea, <sup>3</sup>Sungkyunkwan Univ., Korea

**[We-P029]****Assessing recovery of mTBI patients using functional connectivity: A resting state magnetoencephalographic study**

George Zouridakis<sup>1</sup>, Lianyang Li<sup>1</sup>, Xianghong Arakaki<sup>2</sup>, Thao Tran<sup>2</sup>, Nikhil Padhye<sup>3</sup>, and Michael Harrington<sup>2</sup>

<sup>1</sup>Univ. of Houston, USA, <sup>2</sup>Huntington Medical Research Inst., USA, <sup>3</sup>The Univ. of Texas Health Science Center at Houston, USA

**[We-P030]****Neural correlates of emotional face processing in young adults with autism spectrum disorder**

Rachel Leung<sup>1\*</sup>, Elizabeth Pang<sup>1</sup>, Evdokia Anagnostou<sup>2</sup>, and Margot Taylor<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children, Canada, <sup>2</sup>Holland-Bloorview Kids Rehabilitation Hospital, Canada

## 18 : Neuro-modulation

### [We-P031]

#### **Evidence for state dependent direct effects of alpha band transcranial alternating current stimulation**

Philipp Ruhnau<sup>1\*</sup>, Thomas Hartmann<sup>1\*</sup>, Toralf Neuling<sup>1</sup>, Marco Fusca<sup>2</sup>, Christoph Herrmann<sup>3</sup>, Gianpaolo Demarchi<sup>1</sup>, and Nathan Weisz<sup>1</sup>

<sup>1</sup>CCNS Universität Salzburg, Austria, <sup>2</sup>Univ. of Trento, Italy, <sup>3</sup>Universität Oldenburg, Germany

### [We-P032]

#### **Online state-dependent effects of transcranial alternating current stimulation**

Marco Fusca<sup>1\*</sup>, Philipp Ruhnau<sup>2</sup>, Toralf Neuling<sup>2</sup>, Gianpaolo Demarchi<sup>2</sup>, and Nathan Weisz<sup>2</sup>

<sup>1</sup>Center for Mind Brain Sciences, Italy, <sup>2</sup>Paris-Lodron Universität Salzburg, Austria

### [We-P033]

#### **On the relationship between cortical excitability and visual oscillatory responses: a concurrent tDCS–MEG study**

Sophie Esterer<sup>1\*</sup>, Tom R. Marshall<sup>2</sup>, Jim D. Herring<sup>2</sup>, Til O. Bergmann<sup>3</sup>, and Ole Jensen<sup>2</sup>

<sup>1</sup>Cardiff Univ., UK, <sup>2</sup>Radboud Univ., The Netherlands, <sup>3</sup>Univ. of Tübingen, Germany

### [We-P034]

#### **Modulations on cortical oscillations by levodopa and Subthalamic deep brain stimulation in patients with Parkinson's disease, a MEG study**

Chunyan Cao<sup>1\*</sup>, Ke Zeng<sup>2</sup>, Dianyou Li<sup>1</sup>, Shikun Zhan<sup>1</sup>, Jing Zhang<sup>1</sup>, Xiaoli Li<sup>2</sup>, and Bomin Sun<sup>1\*</sup>

<sup>1</sup>Ruijin Hospital, China, <sup>2</sup>Beijing Normal Univ., China

### [We-P035]

#### **Detecting the pathway of tACS in human brain**

Jingwei Sheng<sup>\*</sup>, Yuhui Chai, and Jia-hong Gao

Peking Univ., China

### [We-P036]

#### **Effect of transcranial direct current stimulation on visually induced motion sickness**

EunHee Chang, Hyeonjin Jeon, and Hyun Taek Kim<sup>\*</sup>

Korea Univ., Korea

### [We-P037]

#### **Therapeutic implication of combined rTMS and tDCS for post-stroke motor impairment**

Eunhee Park, Jae Yong Cho, Ahee Lee, Won Hyuk Chang, and Yun-Hee Kim <sup>\*</sup>

Sungkyunkwan Univ., Korea

### [We-P038]

#### **Imaging phase locking dynamics during transcranial alternating current stimulation (tACS) in the MEG**

Matthias Witkowski<sup>1\*</sup>, Stephen E. Robinson<sup>2</sup>, and Surjo R. Soekadar<sup>1\*</sup>

<sup>1</sup>Univ. Hospital of Tübingen, Germany, <sup>2</sup>Nat'l Inst. of Mental Health, USA

**19 : Next Generation Technology****[We-P039]****An innovative technology to quantitatively detect liver iron with ultrasensitive magnetoelectric susceptometers**Hao Xi\*, Xiaoshi Qian, Meng-Chien Lu, and Qiming Zhang  
*The Pennsylvania State Univ., USA***[We-P040]****Magneto-trichography: Magnetic fields produced by human hair follicles**Sheraz Khan<sup>1</sup> and David Cohen<sup>1,2</sup>  
*<sup>1</sup>Harvard Medical School, USA, <sup>2</sup>MIT, USA***[We-P041]****The potential of optically-pumped magnetometers for magnetoencephalography: a simulation study**Elena Boto<sup>1\*</sup>, Richard Bowtell<sup>1</sup>, Peter Kruger<sup>1</sup>, Mark Fromhold<sup>1</sup>, Peter Morris<sup>1</sup>, Sofie Meyer<sup>2</sup>, Gareth Barnes<sup>2</sup>, and Matthew Brookes<sup>1\*</sup>  
*<sup>1</sup>Univ. of Nottingham, UK, <sup>2</sup>Univ. College London, UK***[We-P042]****Room temperature magnetoencephalography using optically-pumped magnetometers**Elena Boto<sup>1\*</sup>, Sofie Meyer<sup>2</sup>, Vishal Shah<sup>3</sup>, Orang Alem<sup>3</sup>, Svenja Knappe<sup>4</sup>, Peter Kruger<sup>1</sup>, Mark Fromhold<sup>1</sup>, Mark Lim<sup>5</sup>, Peter Morris<sup>1</sup>, Richard Bowtell<sup>1</sup>, Gareth Barnes<sup>2</sup>, and Matthew Brookes<sup>1\*</sup>  
*<sup>1</sup>Univ. of Nottingham, UK, <sup>2</sup>Univ. College London, UK, <sup>3</sup>QuSpin Inc., USA, <sup>4</sup>NIST, USA, <sup>5</sup>Chalk Studios Ltd., UK***[We-P043]****In vivo and in vitro magnetic recordings of neuronal activity with GMR sensors**Vincent Trauchessec<sup>1\*</sup>, Laure Caruso<sup>1</sup>, Josué Trejo-Rosillo<sup>1</sup>, Gilles Ouanounou<sup>2</sup>, Francesca Barbieri<sup>2</sup>, Thierry Bal<sup>2</sup>, Alain Destexhe<sup>2</sup>, Thomas Wunderle<sup>3</sup>, Christopher Lewis<sup>3</sup>, Jianguang Ni<sup>3</sup>, Claude Fermon<sup>1</sup>, Pascal Fries<sup>3,4</sup>, and Myriam Pannetier-Lecoeur<sup>1</sup>  
*<sup>1</sup>Université Paris Saclay, France, <sup>2</sup>CNRS, France, <sup>3</sup>Ernst Strungmann Inst., Germany, <sup>4</sup>Donders Inst. for Brain, Cognition, Behaviour, The Netherlands***[We-P044]****Innocuous alginate-based hydrogels for rapid EEG monitoring and cleaning**Patrique Fiedler<sup>1,2\*</sup>, Paulo Pedrosa<sup>3,4</sup>, Lorenzo Schinaia<sup>2,5</sup>, Beatriz Vasconcelos<sup>3</sup>, Ana C. Martins<sup>3</sup>, Maria H. Amaral<sup>3</sup>, Silvia Comani<sup>2,5</sup>, Jens Hauelsen<sup>1,3</sup>, and Carlos Fonseca<sup>3,7\*</sup>  
*<sup>1</sup>TU Ilmenau, Germany, <sup>2</sup>Casa di Cura Privata Villa Serena, Italy, <sup>3</sup>Universidade do Porto, Portugal, <sup>4</sup>Institut FEMTO-ST, France, <sup>5</sup>Univ. "G. d'Annunzio" Pescara-Chieti, Italy, <sup>6</sup>Univ. Hospital Jena, Germany, <sup>7</sup>Univ. of Coimbra, Portugal***[We-P045]****Active magnetic shield for optical neuromagnetic measurements**Joonas Iivanainen\* and Lauri Parkkonen  
*Aalto Univ., Finland*

[We-P046]

**Visualization of electrophysiological activity in cervical spinal cord and spinal nerves by magnetospinography**

Shigenori Kawabata<sup>1\*</sup>, Sastoshi Sumiya<sup>1</sup>, Yuko Hoshino<sup>1</sup>, Yoshiaki Adachi<sup>2</sup>, Kensuke Sekihara<sup>1</sup>, Shuta Ushio<sup>1</sup>, Taishi Watanabe<sup>1,3</sup>, and Atsushi Okawa<sup>1</sup>

<sup>1</sup>Tokyo Medical and Dental Univ., Japan, <sup>2</sup>Kanazawa Inst. of Tech., Japan, <sup>3</sup>Ricoh Company, Ltd., Japan

[We-P047]

**Quantifying the benefit of high-Tc SQUID-based MEG: comparison of three practical layouts**

Bushra Riaz<sup>1\*</sup>, Christoph Pfeiffer<sup>2</sup>, and Justin Schneiderman<sup>1</sup>

<sup>1</sup>Sahlgrenska Academy and Univ. of Gothenburg, Sweden, <sup>2</sup>Chalmers Univ. of Tech., Sweden

[We-P048]

**Development of a 7-channel High-Tc MEG system**

Christoph Pfeiffer<sup>1\*</sup>, Silvia Ruffieux<sup>1</sup>, Justin Schneiderman<sup>2</sup>, Maxim Chukharkin<sup>1</sup>, Minshu Xie<sup>1</sup>, Alexey Kalabukhov<sup>1</sup>, and Dag Winkler<sup>1</sup>

<sup>1</sup>Chalmers Univ. of Tech., Sweden, <sup>2</sup>Sahlgrenska Academy and Univ. of Gothenburg, Sweden

[We-P049]

**High-Tc SQUID magnetometers for on-scalp MEG**

Silvia Ruffieux<sup>1\*</sup>, Maxim Chukharkin<sup>1</sup>, Minshu Xie<sup>1</sup>, Alexey Kalabukhov<sup>1</sup>, Christoph Pfeiffer<sup>1</sup>, Justin Schneiderman<sup>2</sup>, and Dag Winkler<sup>1</sup>

<sup>1</sup>Chalmers Univ. of Tech., Sweden, <sup>2</sup>Sahlgrenska Academy and Univ. of Gothenburg, Sweden

[We-P050]

**Measuring long-lived magnetisation using a Magnetoencephalography (MEG) system**

Emma Perry, Benjamin Prestwich, Matthew Brookes, and Richard Bowtell

Univ. of Nottingham, UK

[We-P051]

**Uninterrupted noise-free operation of a magnetometer-based MEG with a closed cycle helium recycler**

Yoshio Okada<sup>1\*</sup>, Limin Sun<sup>1</sup>, and Chao Wang<sup>2</sup>

<sup>1</sup>Harvard Medical School, USA, <sup>2</sup>Cryomech, Inc., USA

[We-P052]

**Detection of magnetic signals from the spinal cord using a single channel MEG sensor**

Shaquile Nijjer<sup>1\*</sup>, Nicholas Peatfield<sup>1</sup>, Mark Tillotson<sup>2</sup>, Benjamin McGhie<sup>2</sup>, Alexandra Talpalaru<sup>1</sup>, Luke Conroy<sup>3</sup>, Carolyn Sparrey<sup>1</sup>, and Teresa P. L. Cheung<sup>1,4\*</sup>

<sup>1</sup>Simon Fraser Univ., Canada, <sup>2</sup>CTF MEG International Services Limited Partnership, Canada, <sup>3</sup>Univ. College Dublin, Ireland, <sup>4</sup>Fraser Health Authority, Canada

**20 : Ongoing Activity and Resting State**

[We-P053]

**Evaluating eyes open versus eyes closed resting-state in Schizophrenia MEG datasets through spectral analysis and functional connectivity**

Felicha Candelaria-Cook<sup>1,2\*</sup>, Jon Houck<sup>2</sup>, Lori Sanfratello<sup>2</sup>, Phil Kroth<sup>1</sup>, Jose Canive<sup>2</sup>, and Julia Stephen<sup>2</sup>

<sup>1</sup>Univ. of New Mexico Health Sciences Center, USA, <sup>2</sup>The Mind Research Network, USA

**[We-P054]****Characterization of resting state networks using MEG in a large cohort of healthy subjects.**Praveen Sripad<sup>1\*</sup>, Lukas Breuer<sup>1</sup>, Frank Boers<sup>1</sup>, Eberhard Eich<sup>1</sup>, N. Jon Shah<sup>1,2,3</sup>, and Jürgen Dammers<sup>1</sup><sup>1</sup>Forschungszentrum Juelich, Germany, <sup>2</sup>RWTH Aachen, Germany, <sup>3</sup>Jülich Aachen Research Alliance, Germany**[We-P055]****Automated analysis of resting state cortical oscillatory characteristics using Magnetoencephalography (MEG)**

Thomas Donoghue\*, Priyadarshini Sebastian, and Bradley Voytek

Univ. of California, San Diego, USA

**[We-P056]****Synchronous intra and cross-networks interactions of the default-mode network**Vincent Wens<sup>1\*</sup>, Marc Vander Ghinst<sup>1</sup>, Alison Mary<sup>1</sup>, Mathieu Bourguignon<sup>2</sup>, Brice Marty<sup>1</sup>, Gilles Naeije<sup>1</sup>, Philippe Peigneux<sup>1</sup>, Serge Goldman<sup>1</sup>, and Xavier De Tiège<sup>1</sup><sup>1</sup>Université Libre de Bruxelles, Belgium, <sup>2</sup>Basque Center on Cognition, Brain & Language, Spain**[We-P057]****Heritability of resting-state functional connectivity in MEG and fMRI**Giles Colclough<sup>1\*</sup>, Stephen Smith<sup>2</sup>, Thomas Nichols<sup>3</sup>, Prejaas Tewarie<sup>4</sup>, Matthew Brookes<sup>4</sup>, Anderson Winkler<sup>2</sup>, Matthew Glasser<sup>5</sup>, David Van Essen<sup>5</sup>, and Mark Woolrich<sup>1</sup><sup>1</sup>Oxford Centre for Human Brain Activity, UK, <sup>2</sup>Oxford Centre for Functional MRI of the Brain, UK, <sup>3</sup>Univ. of Warwick, UK, <sup>4</sup>Univ. of Nottingham, UK, <sup>5</sup>Univ. of Washington, USA**[We-P058]****MEG resting state network connectivity dynamics from childhood to late adulthood**Simeon M. Wong<sup>1\*</sup>, Margot J. Taylor<sup>1,2</sup>, and Benjamin T Dunkley<sup>1,2\*</sup><sup>1</sup>Hospital for Sick Children, Canada, <sup>2</sup>Univ. of Toronto, Canada**[We-P059]****Measurement of magnetomyography using an array of magnetoresistive(MR) sensor**Shigenori Kawabata<sup>1</sup>, Shuta Ushio<sup>1</sup>, Tomohiko Shibuya<sup>2</sup>, Yoshiaki Adachi<sup>3</sup>, Kensuke Sekihara<sup>1</sup>, and Atsushi Okawa<sup>1</sup><sup>1</sup>Tokyo Medical and Dental Univ., Japan, <sup>2</sup>TDK Corp., Japan, <sup>3</sup>Kanazawa Inst. of Tech., Japan**[We-P060]****Phase-amplitude coupling in the resting human brain**Janet Gieh<sup>1,2\*</sup>, Jörg Hipp<sup>1</sup>, Anna-Antonia Pape<sup>1,2</sup>, and Markus Siegel<sup>1\*</sup><sup>1</sup>Univ. of Tübingen, Germany, <sup>2</sup>IMPRS for Cognitive and Systems Neuroscience, Germany**[We-P061]****The electrophysiological connectome is maintained in healthy elders: a power envelope correlation MEG study**

Nicolas Coquelet\*, Alison Mary, Maribel Pulgarin, Charline Urbain, Serge Goldman, Philippe Peigneux, Vincent Wens, and Xavier De Tiège

Université Libre de Bruxelles, Belgium

[We-P062]

**Neuromagnetic default-mode network connectivity correlates with occipital  $\alpha$ -band power at rest**  
Maribel Pulgarin<sup>1\*</sup>, Vincent Wens<sup>1</sup>, Nicolas Coquelet<sup>1</sup>, Marc Vander Ghinst<sup>1</sup>, Alison Mary<sup>1</sup>, Catherine Clumeck<sup>1</sup>, Mathieu Bourguignon<sup>2</sup>, Brice Marty<sup>1</sup>, Gilles Naeije<sup>1</sup>, Philippe Peigneux<sup>1</sup>, Serge Goldman<sup>1</sup>, and Xavier De Tiège<sup>1</sup>  
<sup>1</sup>Université libre de Bruxelles, Belgium, <sup>2</sup>Basque Center on Cognition, Brain & Language, Spain

[We-P063]

**Critical dynamics in resting state brain activity is associated with impulsivity and dopamine-related polymorphisms**

Jaana Simola<sup>1\*</sup>, Matias Palva<sup>1</sup>, Tiina Paunio<sup>1,2,3</sup>, Katri Kantojärvi<sup>2</sup>, Elvira Brattico<sup>4,5</sup>, and Satu Palva<sup>1</sup>  
<sup>1</sup>Univ. of Helsinki, Finland, <sup>2</sup>Nat'l Inst. for Health and Welfare, Finland, <sup>3</sup>Helsinki Univ. Hospital, Finland, <sup>4</sup>Aarhus Univ., Denmark, <sup>5</sup>The Royal Academy of Music Aarhus, Denmark

[We-P064]

**Dynamic scales of spontaneous neuromagnetic activity**

Denis Engemann\* and Virginie van Wassenhove  
INSERM, France

[We-P065]

**An exploration of differences in oscillatory resting state networks between patients with schizophrenia and controls**

Gemma Williams\*, Laura Whitlow, Loes Koelewijn, James Walters, and Krish Singh  
Cardiff Univ., UK

**21 : Physiological Basis of MEG and EEG Signals**

[We-P066]

**Consideration of the electromagnetic signal generated by the neural activity assuming pulse-frequency modulation**

Masanori Higuchi\*  
Kanazawa Inst. of Tech., Japan

[We-P067]

**Laminar specificity of high and low frequency oscillations during action selection**

James Bonaiuto<sup>1\*</sup>, Sofie S. Meyer<sup>1</sup>, Gareth Barnes<sup>1</sup>, Fred Dick<sup>2</sup>, and Sven Bestmann<sup>1</sup>  
<sup>1</sup>Univ. College London, UK, <sup>2</sup>Univ. of London, UK

[We-P068]

**Non-invasive recording of laminar dynamics**

Holly Rossiter\*, Luzia Troebinger, James Bonaiuto, Sofie Meyer, Sheena Waters, Simon Little, Sven Bestmann, and Gareth Barnes\*  
Univ. College London, UK

[We-P069]

**Appraisal of appropriate definition of baseline for somatosensory evoked magnetic fields**

Hidekazu Saito<sup>1\*</sup>, Shogo Yazawa<sup>1</sup>, Jun Shinozaki<sup>1</sup>, Hideaki Shiraishi<sup>2</sup>, Masao Matsuhashi<sup>3</sup>, and Takashi Nagamine<sup>1</sup>  
<sup>1</sup>Sapporo Medical Univ., Japan, <sup>2</sup>Hokkaido Univ., Japan, <sup>3</sup>Kyoto Univ., Japan

**[We-P070]****Laminar profile of cross-frequency interactions**Mathilde Bonnefond<sup>1\*</sup>, Timo van Kerkoerle<sup>2</sup>, Pieter Roelfsema<sup>3</sup>, and Ole Jensen<sup>1</sup><sup>1</sup>Radboud Univ., The Netherlands, <sup>2</sup>Rockefeller Univ., USA, <sup>3</sup>Netherlands Inst. for Neuroscience, The Netherlands**22 : Psychiatric Disorders****[We-P071]****EEG characteristics in first psychotic episode patients**Alejandro Riera<sup>1,2</sup>, Giulio Ruffini<sup>1</sup>, Aureli Soria-Frish<sup>1</sup>, Lluís Fuentemilla<sup>2,3</sup>, Diego Lozano-Soldevilla<sup>2</sup>, Emilio Rojo<sup>4,5</sup>, Oscar Pino<sup>4,2</sup>, and Carles Grau<sup>1,2</sup><sup>1</sup>Starlab Barcelona SL, Spain, <sup>2</sup>Univ. of Barcelona, Spain, <sup>3</sup>Inst. of Biomedical Research Bellvitge, Spain, <sup>4</sup>Benito Menni CASM, Spain, <sup>5</sup>Int'l Univ. of Catalonia, Spain**[We-P072]****Neural oscillations during social exclusion - a MEG study**Huiying Wang<sup>1,2,3</sup>, In-Seon Lee<sup>1,2,3</sup>, Paul Enck<sup>1</sup>, and Christoph Braun<sup>2,4\*</sup><sup>1</sup>Univ. of Tübingen, Germany, <sup>2</sup>Univ. Hospital Tübingen, Germany, <sup>3</sup>IMPRS for Cognitive and Systems Neuroscience, Tübingen, Germany, <sup>4</sup>Univ. of Trento, Italy**[We-P073]****Multi-frequency analysis of brain connectivity under negative stimulus in depression: A magnetoencephalography study**Kun Bi<sup>1</sup>, Ling-ling Hua<sup>2</sup>, Shui Tian<sup>1</sup>, Si-qi Zhang<sup>1</sup>, Qing Lu<sup>1,3\*</sup>, and Zhi-jian Yao<sup>2\*</sup><sup>1</sup>Southeast Univ., China, <sup>2</sup>Nanjing Medical Univ., China, <sup>3</sup>Suzhou Research Inst. of Southeast Univ., China**[We-P074]****Differences in task performance between 'High' and 'Low' sub-clinical obsessive compulsive disorder checkers is reflected in MEG recorded Theta activity during a working memory task**Gerard Gooding-Williams<sup>1\*</sup>, Hongfang Wang<sup>1</sup>, Jonathan Cavanagh<sup>2</sup>, Gregor Thut<sup>2</sup>, Joachim Gross<sup>2</sup>, and Klaus Kessler<sup>1</sup><sup>1</sup>Aston Univ., UK, <sup>2</sup>Univ. of Glasgow, UK**[We-P075]****Oscillation power analysis of resting state brain networks in depression: A magnetoencephalography study**Siqi Zhang<sup>1</sup>, Kun Bi<sup>1</sup>, Shui Tian<sup>1</sup>, Qing Lu<sup>1\*</sup>, and Zhijian Yao<sup>2,3\*</sup><sup>1</sup>Southeast Univ., China, <sup>2</sup>Nanjing Medical Univ., China, <sup>3</sup>Nanjing Univ., China**[We-P076]****MEG functional connectivity features between bipolar and unipolar depression patients**

**Temporal variability along the visual pathway during face processing**

Jo-Fu Lotus Lin<sup>1\*</sup>, Chih-Che Chou<sup>2</sup>, Wen-Jui Kuo<sup>3</sup>, and Fa-Hsuan Lin<sup>1</sup>  
*<sup>1</sup>Nat'l Taiwan Univ., Taiwan, <sup>2</sup>Taipei Veterans General Hospital, Taiwan, <sup>3</sup>Nat'l Yang Ming Univ., Taiwan*

[We-P146]

**The sex differences in brain activity of processing emotional faces in early processes**

Shih-Tseng Huang<sup>1\*</sup>, Ming-Chun Lee<sup>1</sup>, Pei-Shu Tsai<sup>2</sup>, Ovid J.-L. Tzeng<sup>3,4</sup>, Daisy L. Hung<sup>3,5</sup>, and Denise H. Wu<sup>5</sup>  
*<sup>1</sup>Nat'l Chung-Cheng Univ., Taiwan, <sup>2</sup>Nat'l Changhua Univ. of Edu., Taiwan, <sup>3</sup>Nat'l Yang-Ming Univ., Taiwan, <sup>4</sup>The Inst. of Linguistics, Academia Sinica, Taiwan, <sup>5</sup>Nat'l Central Univ., Taiwan*

[We-P147]

**Study of MEG measurements of the visual evoked magnetic fields for arithmetic logic formula response**

Yan-Cheng Chan<sup>1,2</sup>, Shiannfong Huang<sup>1\*</sup>, Zhe-Yu Li<sup>1,3</sup>, Shu-Hsien Liao<sup>2</sup>, Michelle Liou<sup>4</sup>, and Arthur C. Tsai<sup>4</sup>  
*<sup>1</sup>Oriental Inst. of Tech., Taiwan, <sup>2</sup>Nat'l Taiwan Normal Univ., Taiwan, <sup>3</sup>Nat'l Yunlin Univ. of Science and Tech., Taiwan, <sup>4</sup>Inst. of Statistical Science, Academia Sinica, Taiwan*

**[We-P148]**

**How far does visual frequency tagging above 60 Hz travel?**

Jim Herring<sup>1\*</sup>, Jerome Herpers<sup>1</sup>, Til Bergmann<sup>2</sup>, and Ole Jensen<sup>1</sup>  
<sup>1</sup>Radboud Univ., The Netherlands, <sup>2</sup>Univ. of Tübingen, Germany

**[We-P149]**

**Dynamics and properties of mental models of spinning 3D objects: an M/EEG study**

Clement (Jean Benoit) Moutard<sup>1,2,3\*</sup> and Stanislas Dehaene<sup>1,2,3,4</sup>  
<sup>1</sup>INSERM, France, <sup>2</sup>Commissariat à l'Énergie Atomique, France, <sup>3</sup>Université Paris-Sud, France, <sup>4</sup>College de France, France
